ACS DEMOGRAPHIC AND HOUSING ESTIMATES

2013-2017 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Subject	Bingham township, Orange County, North Carolina			
	Estimate	Margin of Error	Percent	Percent Margin of Error
SEX AND AGE				
Total population	7,005	+/-577	7,005	(X)
Male	3,576	+/-339	51.0%	+/-2.4
Female	3,429	+/-329	49.0%	+/-2.4
Sex ratio (males per 100 females)	104.3	+/-10.1	(X)	(X)
Under 5 years	333	+/-165	4.8%	+/-2.2
5 to 9 years	327	+/-139	4.7%	+/-1.7
10 to 14 years	480	+/-169	6.9%	+/-2.3
15 to 19 years	360	+/-132	5.1%	+/-1.8
20 to 24 years	68	+/-71	1.0%	+/-1.0
25 to 34 years	820	+/-295	11.7%	+/-4.0
35 to 44 years	883	+/-253	12.6%	+/-3.4
45 to 54 years	1,019	+/-247	14.5%	+/-3.5
55 to 59 years	825	+/-216	11.8%	+/-3.1
60 to 64 years	617	+/-160	8.8%	+/-2.5
65 to 74 years	903	+/-243	12.9%	+/-3.4
75 to 84 years	219	+/-103	3.1%	+/-1.5
85 years and over	151	+/-90	2.2%	+/-1.3
Median age (years)	47.1	+/-4.0	(X)	(X)
Under 18 years	1,439	+/-355	20.5%	+/-3.9
16 years and over	5,797	+/-396	82.8%	+/-3.7
18 years and over	5,566	+/-389	79.5%	+/-3.9
21 years and over	5,503	+/-383	78.6%	+/-4.1
62 years and over	1,604	+/-253	22.9%	+/-3.6
65 years and over	1,273	+/-221	18.2%	+/-3.1
18 years and over	5,566	+/-389	5,566	(X)
Male	2,661	+/-233	47.8%	+/-2.7
Female	2,905	+/-258	52.2%	+/-2.7
Sex ratio (males per 100 females)	91.6	+/-9.9	(X)	(X)

Subject	Bingham township, Orange County, North Carolina			
	Estimate	Margin of Error	Percent	Percent Margin of Error
65 years and over	1,273	+/-221	1,273	(X)
Male	627	+/-127	49.3%	+/-7.4
Female	646	+/-161	50.7%	+/-7.4
Sex ratio (males per 100 females)	97.1	+/-30.1	(X)	(X)
RACE				
Total population	7,005	+/-577	7,005	(X)
One race	6,920	+/-579	98.8%	+/-1.1
Two or more races	85	+/-75	1.2%	+/-1.1
One race	6,920	+/-579	98.8%	+/-1.1
White	6,369	+/-622	90.9%	+/-4.0
Black or African American	363	+/-221	5.2%	+/-3.2
American Indian and Alaska Native	0	+/-17	0.0%	+/-0.5
Cherokee tribal grouping	0	+/-17	0.0%	+/-0.5
Chippewa tribal grouping	0	+/-17	0.0%	+/-0.5
Navajo tribal grouping	0	+/-17	0.0%	+/-0.5
Sioux tribal grouping	0	+/-17	0.0%	+/-0.5
Asian	180	+/-133	2.6%	+/-1.9
Asian Indian	160	+/-131	2.3%	+/-1.9
Chinese	0	+/-17	0.0%	+/-0.5
Filipino	18	+/-28	0.3%	+/-0.4
Japanese	0	+/-17	0.0%	+/-0.5
Korean	2	+/-4	0.0%	+/-0.1
Vietnamese	0	+/-17	0.0%	+/-0.5
Other Asian	0	+/-17	0.0%	+/-0.5
Native Hawaiian and Other Pacific Islander	0	+/-17	0.0%	+/-0.5
Native Hawaiian	0	+/-17	0.0%	+/-0.5
Guamanian or Chamorro	0	+/-17	0.0%	+/-0.5
Samoan	0	+/-17	0.0%	+/-0.5
Other Pacific Islander	0	+/-17	0.0%	+/-0.5
Some other race	8	+/-13	0.1%	+/-0.2
Two or more races	85	+/-75	1.2%	+/-1.1
White and Black or African American	41	+/-63	0.6%	+/-0.9
White and American Indian and Alaska Native	30	+/-38	0.4%	+/-0.5
White and Asian	14	+/-22	0.2%	+/-0.3
Black or African American and American Indian and Alaska Native	0	+/-17	0.0%	+/-0.5
Race alone or in combination with one or more other races				
Total population	7,005	+/-577	7,005	(X)
White	6,454	+/-620	92.1%	+/-3.9
Black or African American	404	+/-230	5.8%	+/-3.3
American Indian and Alaska Native	30	+/-38	0.4%	+/-0.5
Asian	194	+/-135	2.8%	+/-1.9
Native Hawaiian and Other Pacific Islander	0	+/-17	0.0%	+/-0.5
Some other race	8	+/-13	0.1%	+/-0.2
HISPANIC OR LATINO AND RACE				
Total population	7,005	+/-577	7,005	(X)
Hispanic or Latino (of any race)	260	+/-327	3.7%	+/-4.5
Mexican	228	+/-311	3.3%	+/-4.3
Puerto Rican	16	+/-24	0.2%	+/-0.3
Cuban	0	+/-17	0.0%	+/-0.5
Other Hispanic or Latino	16	+/-24	0.2%	+/-0.3
Not Hispanic or Latino	6,745	+/-527	96.3%	+/-4.5
White alone	6,117	+/-589	87.3%	+/-6.1
Black or African American alone	363	+/-221	5.2%	+/-3.2
American Indian and Alaska Native alone	0	+/-17	0.0%	+/-0.5

Subject	Bingham township, Orange County, North Carolina			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Asian alone	180	+/-133	2.6%	+/-1.9
Native Hawaiian and Other Pacific Islander alone	0	+/-17	0.0%	+/-0.5
Some other race alone	0	+/-17	0.0%	+/-0.5
Two or more races	85	+/-75	1.2%	+/-1.1
Two races including Some other race	0	+/-17	0.0%	+/-0.5
Two races excluding Some other race, and Three or more races	85	+/-75	1.2%	+/-1.1
Total housing units	3,243	+/-188	(X)	(X)
CITIZEN, VOTING AGE POPULATION				
Citizen, 18 and over population	5,312	+/-386	5,312	(X)
Male	2,520	+/-244	47.4%	+/-3.1
Female	2,792	+/-262	52.6%	+/-3.1

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2013-2017 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2013-2017 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Unrelated individuals 15 years and over	(X)	(X)	17.3%	+/-7.6

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2012. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see https://www.census.gov/library/working-papers/2010/demo/coverage_edits_final.html for more details. The 2008 data table in American FactFinder does not incorporate these edits. Therefore, the estimates that appear in these tables are not comparable to the estimates in the 2009 and later tables. Select geographies of 2008 data comparable to the 2009 and later tables are available at <https://www.census.gov/data/tables/time-series/acs/1-year-re-run-health-insurance.html>. The health insurance coverage category names were modified in 2010. See https://www.census.gov/topics/health/health-insurance/about/glossary.html#par_textimage_18 for a list of the insurance type definitions.

Beginning in 2017, selected variable categories were updated, including age-categories, income-to-poverty ratio (IPR) categories, and the age universe for certain employment and education variables. See user note entitled "Health Insurance Table Updates" for further details.

While the 2013-2017 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2013-2017 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-l' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+u' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

30.0 to 34.9 percent	2	+/-3	0.4%	+/-0.7
35.0 percent or more	39	+/-49	8.6%	+/-10.8
Not computed	52	+/-44	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Households not paying cash rent are excluded from the calculation of median gross rent.

Telephone service data are not available for certain geographic areas due to problems with data collection of this question that occurred in 2015 and 2016. Both ACS 1-year and ACS 5-year files were affected. It may take several years in the ACS 5-year files until the estimates are available for the geographic areas affected.

While the 2013-2017 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

COMPUTERS AND INTERNET USE				
Total households	2,892	+/-197	2,892	(X)
With a computer	2,696	+/-204	93.2%	+/-3.6
With a broadband Internet subscription	2,280	+/-190	78.8%	+/-5.5

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).

Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes when using 2013 data or multi-year data containing data from 2013. For more information, see: Language User Note.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

Data about computer and Internet use were collected by asking respondents to select "Yes" or "No" to each type of computer and each type of Internet subscription. Therefore, respondents were able to select more than one type of computer and more than one type of Internet subscription.

The category "with a broadband Internet subscription" refers to those who said "Yes" to at least one of the following types of Internet subscriptions: Broadband such as cable, fiber optic, or DSL; a cellular data plan; satellite; or a fixed wireless subscription.

An Internet "subscription" refers to a type of service that someone pays for to access the Internet such as a cellular data plan, broadband such as cable, fiber optic or DSL, or other type of service. This will normally refer to a service that someone is billed for directly for Internet alone or sometimes as part of a bundle.

"With a computer" includes those who said "Yes" to at least one of the following types of computers: Desktop or laptop; smartphone; tablet or other portable wireless computer; or some other type of computer.

In 2016, changes were made to the computer and Internet use questions, involving the wording as well as the response options. A crosswalk was used to map pre-2016 data to the post-2016 categories, enabling creation of 5-year data. For more detailed information about the 2016 changes, see the 2016 American Community Survey Content Test Report for Computer and Internet Use located at <https://www.census.gov/programs-surveys/acs/methodology/content-test.htm> or the user note regarding changes in the 2016 questions located at <https://www.census.gov/programs-surveys/acs/technical-documentation/user-notes.html>. For more detailed information about the crosswalk, see the user note regarding the crosswalk located at <https://www.census.gov/programs-surveys/acs/technical-documentation/user-notes.html>.

While the 2013-2017 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
